

A NEW SKI TOURING COLLECTION

SENJA – DEVELOPED FOR DEMANDING ASCENTS AND THRILLING DESCENTS!

Bergans Senja collection is exclusively designed to maximize your comfort and safety when you are ski touring. Thanks to over 50 years of mountain skiing experience, Norwegian designers know the tiny details that can often make the difference. With Senja, they present a collection of quality products made from the best technical fabrics available.

Maximum precision fit - Those seeking to develop their sport need clothing that accompanies their every move. Numerous tests on athletes to evaluate each product in the collection led to the development of maximum precision fit, with nothing left to chance.

Fresh wind - Ascents up steep slopes are physically challenging. Heart rates and body temperature rise inside the garment. This leads rapidly to perspiring, and athletes require a breathable fabric to cool them down. This is why breathability and circulation were top concerns in the development of the Senja collection. What else? Of course, packability, so the product takes up only minimal backpack space.

Only the best – Ski touring often takes place in rugged environments and challenging weather. Products developed for mountain skiing can have a direct impact on the athlete's safety. For this reason, strict demands are made on the materials they use. These must be highly durable and long lasting, offering first-rate functionality.

SENJA HYBRID SOFTSHELL JACKET

And a hybrid softshell jacket like the new Senja hybrid softshell jacket should be in every ski tourers collection. With its combination of two light and highly stretchable softshell fabrics, the new Senja Hybrid Softshell Jacket offers maximum freedom of movement and outstanding temperature regulation. The softshell fabric sewn into the hood and shoulder area is waterproof, while the softshell fabric used in the seat and underarm areas is highly breathable. Both fabrics adjust to movements, providing maximum freedom of movement. Thoughtful details such as two large zippered front pockets, pit zips, reflectors and an extended back section round out the softshell jacket's features, quickly making it the absolute favorite for ski touring. Sale price: €300

SENJA MIDLAYER HOOD JACKET

With its combination of two high-tech fabrics, the Senja Midlayer Hood Jacket will quickly become the most popular midlayer when you are ski touring. The jacket scores points with its ultra-light, windproof and water-repellent polyamide weave lined at the most exposed areas such as the shoulders and upper arms with insulating Clo® Eco Vivo. The lower seat area is fitted with Pontetorto Tecnostretch®, boasting excellent moisture-wicking and quick-drying qualities. Shoulder and side seams are offset to the back for increased comfort when carrying a backpack and to minimize friction. The Senja midlayer hood jacket also features an impressive, tightly fitting hood and a highly protective raised collar. Sale price: €170

SENJA 3L PANT

In developing functional shell clothing for ski touring, it is important to find the intersection between light weight, weather protection and breathability on one side and durability and features on the other. Senja 3L Pants master this challenge by combining two types of excellent Dermizax®NX shell fabrics. Both offer outstanding weather protection and moisture wicking. Long breather zippers with three push strips along the sides of the pant legs ensure maximum circulation in any situation. The zippers facilitate changing in and out of the pants without the need to remove boots. Velcro fasteners on the waistband ensure easy size adjustment. Senja 3L Pants are also feature an inner pocket with safety insertion protector, zip pockets in front and gaiters attached to the inner lining. Sale price: €360

SENJA DOWN LIGHT JACKET WITH HOOD

The Senja Down Light W Jacket was developed with a focus on warmth, light weight and compressibility. The Pertex Quantum® fabric is windproof and water-repellent. The individual cells are filled with RDS-certified down. A high collar and helmet-accommodating hood offer perfect protection for the neck and head. Shoulder and side seams are offset to the back for increased comfort when carrying a backpack and to minimize friction. The product contains bluesign®-approved fabrics and trimmings. Additional equipment features: One of the front pockets can be used as a compression pocket. Elastic bands at the wrist and hem, extended back. Sale price: €280
